

1. The present invention relates to a method and apparatus for
 2. determining the position of a point in a two-dimensional
 3. space. The method and apparatus are particularly useful
 4. in the field of robotics and computer graphics. The
 5. method and apparatus are described in detail in the
 6. accompanying drawings and the following description.
 7. The method and apparatus are described in detail in the
 8. accompanying drawings and the following description.
 9. The method and apparatus are described in detail in the
 10. accompanying drawings and the following description.
